PROJECTS
Github issue Application -
This Application developed using HTML, CSS,JavaScript.In this project, Github data-API-V3 is used to fuse Github data to fetch repositories and associated user details.The fetched data is used to view issues related to the repository. The search field trigger a search when a minimum of 3 characters have been typed and suggest the associated data for this type-ahead plugin is used.

To-Do List Web Application using MVC-
This Application is developed using HTML , CSS , JAVASCRIPT .From this App User can add task in the list, ,store task ,mark them completed, delete the existing tasks, completed tasks, pending tasks. Used MVC design architecture.

Responsive Templates
I've created some responsive templates on themes like salient, shopping cart and holiday home using media queries And bootstrap. Demos are available on my blog.

Image sliders plugin -
In this project built a own Image Carousel plugin using Jquery.
